PROFILE

B.Tech Artificial Intelligence and Data Science undergraduate with strong foundations in Python, SQL, debugging, REST APIs, and backend development. Experienced in building Python applications, and web services using Flask and FastAPI, working with databases, debugging applications, and developing data-driven solutions.

EXPERIENCE

Ether Service, Coimbatore | *Data Analytics Intern (Jun 2025 – Jul 2025)*

- Developed a personalized book recommendation system using content-based filtering on real-world datasets.
- Performed data cleaning, preprocessing, feature engineering, visualization and EDA using Python and Pandas.
- Implemented recommendation algorithms to generate relevant book suggestions based on user preferences and similarity.

PROJECTS

[Intrusion Detection System](#) | *Python, TensorFlow, Wireshark, Scikit-learn*

Built a hybrid CNN-LSTM model to detect malicious network traffic using NSL-KDD and Wireshark packet data. Developed preprocessing and feature extraction pipelines and implemented anomaly visualization for enhanced network threat detection.

[Multilingual News Summarizer](#) | *Python, Flask, Transformers (BART), gTTS*

Developed a Flask-based Python web application for summarizing lengthy news articles using transformer-based NLP. Added multilingual support, text-to-speech conversion, and sentiment analysis to improve accessibility and user experience.

[Multimodal RAG-Based Document Intelligence System](#) | *Python, FastAPI, YOLO, FAISS, Gemini API, Docker*

Developed a Python backend using FastAPI to expose REST APIs for document processing, retrieval, and question answering. Integrated FAISS-based semantic retrieval for text, PDF, and image documents with multimodal processing and vision-language models, and containerized the application using Docker for consistent deployment.

[AI Engineering Drawing Comparison System](#) | *Python, Flask, OpenCV, OCR, Gemini API*

Developed an AI-based image comparison system to detect and visualize differences between engineering drawings. Implemented image preprocessing, alignment, difference detection, OCR, and Gemini API integration to identify & summarize significant changes.

EDUCATION

B.Tech – Artificial Intelligence and Data Science | **KGiSL Institute of Technology, Coimbatore**

CGPA 7.78 / 10 | Expected May 2027

TECHNICAL

Programming: *Python, JavaScript, SQL*

Backend & APIs: *Flask, FastAPI, REST APIs, API Integration, Exception Handling, Debugging*

Databases & Data: *SQL, SQLite, Pandas, NumPy, FAISS, Power BI, Excel*

Web Development: *Flask, FastAPI, HTML, CSS, Bootstrap*

Software Engineering: *Data Structures & Algorithms, Object-Oriented Programming, Git, GitHub*

AI/ML: *TensorFlow, Scikit-learn, CNN, LSTM, Transformers, LLMs, RAG, Computer Vision, YOLO, OCR*

DevOps & Tools: *Docker, Git, GitHub, Wireshark, VS Code*

Soft Skills: *Problem Solving, Analytical Thinking, Teamwork, Time Management, Self-Learning*

CERTIFICATIONS

- Oracle Cloud Infrastructure 2025 Certified AI Foundations Associate
- Oracle Agentic AI Certified Foundations Associate
- Cyber Job Simulation – Forage
- Responsive Web Design – FreeCodeCamp
